Igniting the Mobile Enterprise

WIC Mobile Enterprise

WIC Forms

Anytime. Anywhere.

WIC Forms provides WIC users with the ability to create, deploy and use electronic forms to capture data while in the field.

Specific features include:

- » An out-of-the-box solution that is able to be deployed within hours, with the ability to create and push out custom electronic forms
- » Wirelessly deliver electronic forms to specific mobile users, ensuring that the right people have up-to-date and accurate corporate information at their fingertips.
- » Data uploaded from forms is inserted directly into the corporate database, enabling users to improve business processes such as avoiding duplicating effort, and all with no integration costs.

How do I turn our BlackBerry investment into competitive advantage?

WIC Mobile Worker provides the ability to create custom electronic forms for data capture enabling mobile workers to:

- » Increase productivity by being enabled to work on or off-line
- » Reduce the frequency of necessary office visits
- » Replaces the need for paper in the business process

How do I increase the return on the investment we made in the BlackBerry?

WIC Mobile Worker enables Users to save time and reduce errors by capturing data in the field, electronically. Capture data once, and upload the data directly to databases, where it instantly becomes part of the enterprise business strategy.

How can I keep mobile workers from having to visit the office so often?

WIC Mobile Worker provides the ability for the mobile workforce to remotely participate in the organization's key business processes, by capturing and uploading data from the field:

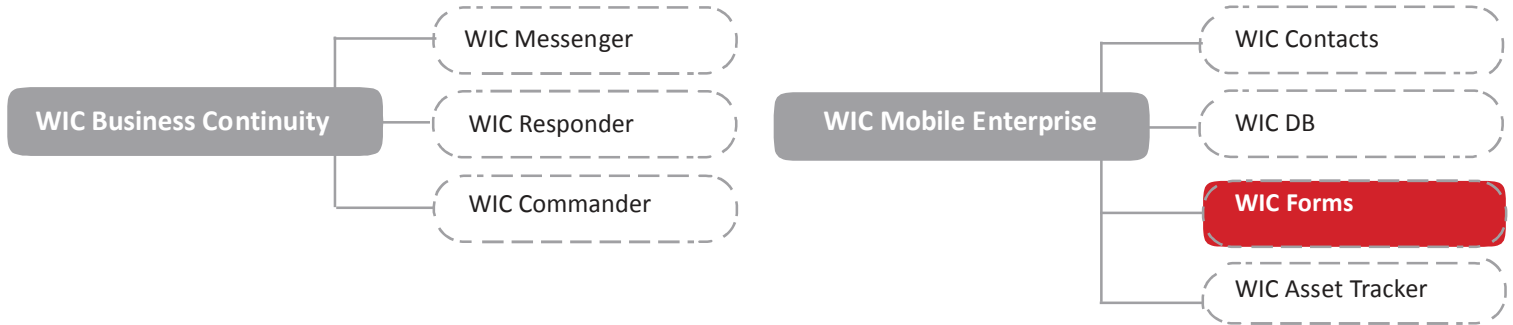

- » Enables mobile workers to reduce the frequency of necessary office visits
- » Replaces the need for paper in the business process, removing duplication of effort, and the associated opportunity for errors

WIC Forms is an out-of-the-box solution that provides users with the ability to create and use custom electronic form templates for data capture while in the field. WIC Forms can be deployed within a few hours, with custom forms created and pushed out wirelessly to specific mobile users, ensuring that the right people have up-to-date and accurate corporate information at their fingertips.

Increase Productivity

WIC Forms enable users to acquire data such as customer prospect information, work reports and time sheets, and upload information into the corporate databases, without data re-entry or programming requirements. WIC Forms integrates directly into enterprise data systems, such as Lotus Domino, Oracle, SQLServer, DB2 and MS Access.

Enhanced Usability

The WIC Forms client provides a user friendly interface allowing users to easily navigate forms and records on their handhelds. (Signature Capture on the screen and Barcode scanning available with EnterMo Ruggedized Case) WIC Forms includes an easy to use Forms Editor, an application that guides the administrator through the process of creating and managing forms, enabling control of how they will look on the BlackBerry handheld. As forms are being designed, the Forms Simulator can be used to show how the forms will be displayed on a BlackBerry, greatly helping to speed up the design and deployment process. And WIC Forms provides a flexible deployment structure which enables it to function in both a BES and non-BES environment.
